

Lamp is very stable after 5 min warming up period.

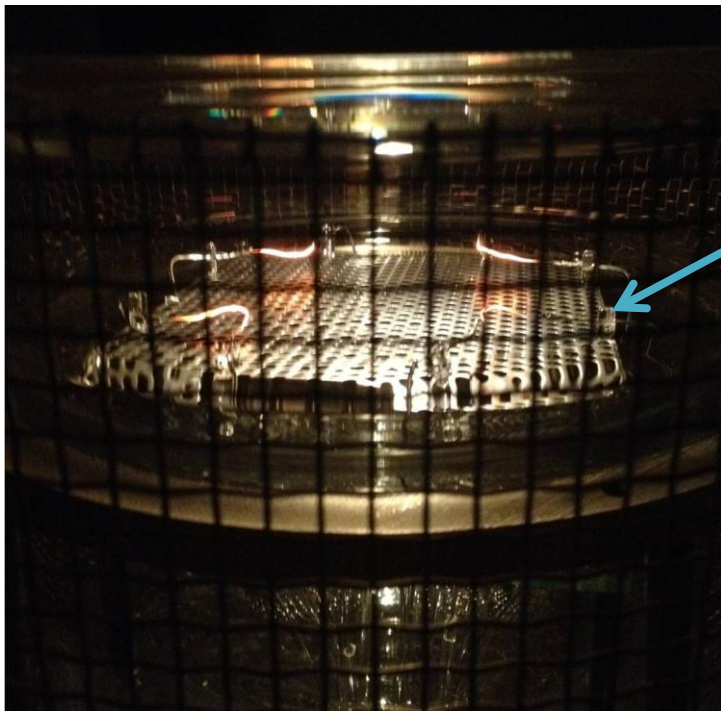

Before deposition

Reflectivity Distribution

Unit: Absolute current value: 10^{-7} A

7.9	7.8	7.8
8.0	7.8	7.8
8.0	8.0	8.0

Not glowing as shiny as the other three beads

Reflectivity Distribution after deposition
Unit: Absolute current value: 10^{-7} A

2.4	2.2	2.0
2.2	2.0	3.2
2.2	4.2	5.8

Uniformity is not bad except the right down corner.

Less Sb deposition.

Sb bead didnt glow as shiny as the other three beads

Photo current connection is not good, need better connection.
