Engineering Answers in Advanced Ceramics

Chemistry Data Sheet
Material Designation: 99.8% Aluminum Oxide
Typical Chemical Analysis

| <u>Content</u> | <u>Weight Percent</u> |
|------------------------------------|-----------------------|
| Al₂O₃ | 99.81% |
| SiO₂ | 0.05% |
| Fe₂O₃ | 0.02% |
| CaO | 0.04% |
| MgO | 0.05% |
| Na₂O | 0.03% |

Note: These numbers represent typical values and are not to be construed as specifications.
